

We train applicators, consultants, engineers and other employees in the industry, power plants, and municipalities

In order to remarkably reduce the costs for the customers we train building applicators, consultants and other employees at the power plants and in municipalities with in the manufacturing industry.

Call or email us to discuss our course and training programs which are tailored to your requirements.

The course is invoiced at the contracted cost only to satisfied customers.

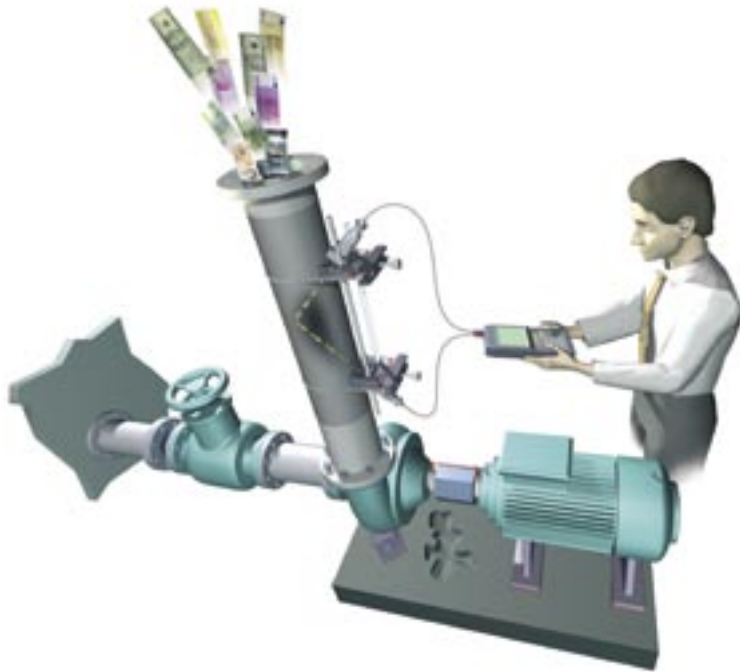

Repairing and protecting metal

The training is focus on:

- Metal damages
- Causes
- Repair methods
- Lifetime
- Cost
- Composite technology
- Area of use
- Application analysis
- SSG 1908
- Cost analysis
- Application reports
- Product choice
- Surface preparation
- Application methods
- Curing

Diagnosis and optimization of pumps and systems

The training focus on:

- Pump technology
- Life Cycle Cost (LCC)
- Energy cost
- Mobile diagnosis
- Pipes
- Speed regulation
- Repair methods
- Wear
- Corrosion
- Chemical attack
- Cavitation
- Mechanical seals
- Packings

Repair and protection of concrete

The training is focus on:

- Concrete damages
- Causes
- Repair methods
- Lifetime
- Application analysis
- Cost analysis
- Product choice
- Area of use
- Application report
- Surface preparation
- Application
- Curing
- Composites for surface protection
- Composites for strengthening
